MEMORANDUM

CIA OPS CTR

TO : NIO/W - Mr. Lehman
FROM : INR - Bob Baraz *BB*
SUBJECT: Comments on SWS Draft Memo

Here are some suggestions for your consideration.
They deal mostly with cleaning up the "challenge" bit.

para 2 line 5

and bringing the analytical techniques of warning-intelligence to bear on community assessments of a current situation.

para 3

Strike "crisis" from the title and read "It includes" vice "Crisis management" in line 3-4.

page 5

Conscience. There needs to be an organization that can make a practice of thinking about current situations in warning intelligence terms. This does not mean devil's advocacy--an institutional bias toward crying wolf--but rather having professional analysts schooled in the discipline of warning intelligence who can bring that perspective into Community deliberations.

An example...

para 10

line of 1 of full tic on page 7 read "has often resulted in "vice requires."

SECRET

State Dept. review completed

SECRET

- 2 -

Para 11

line 8 read "concentrate most of its effort on
"vice" be limited to."

Para 12

lines 5-6 of tick "location:" Read "Location in
the NMIC will have access to relevant intelligence and
ready interface with DIA analysts in the DOC I & W
system." vice "The DOD I & W systems..." sentence.
If the DOD system is the source of warning, who needs
the SWS?

para 14

third line from bottom of page 12; read "and to
participate in community analyses of current situation
"vice" to challenge."

Page 14 penultimate line: Read

"2 develop warning analyses of current situation
or..."

page 15

I recognize "!2rtoco!2topm" as "participation",
but more skilled typists may have trouble.
